

ENVIRONMENTAL POLICY

Shanghai Pudong International Airport Cargo Terminal Co., Ltd. (hereinafter referred to as "PACTL") and Shanghai Pudong International Airport Public Cargo Terminal Co., Ltd. (West) (hereinafter referred to as "PACTL WEST") jointly operate four modern cargo terminals. We provided environmental services including cargo handling operations and equipment preparation, maintenance of equipment, and management of corporate buildings. PACTL has an annual cargo handling capacity of 1.1 million tons, while PACTL WEST's annual cargo handling capacity reaches 1.2 million tons.

PACTL and PACTL WEST have always adhered to the sense of responsibility for environmental protection and regarded sustainable development as the long-term strategic goal of the enterprise. We deeply recognize our important role in global environmental protection and have formulated this environmental policy based on this. This policy applies to all employees and relevant partners working for PACTL and PACTL WEST, aiming to jointly promote green operations and achieve the harmonious development of the environment and business.

We commit to

- Comply with or exceed the requirements of national and local environmental laws and regulations.
- Meet or surpass industry standards and requirements in various aspects of pollution control.
- Actively reduce greenhouse gas emissions by improving energy efficiency, using renewable energy, and procuring low-carbon and high-energy-efficiency products and services.
- Adopt industry-leading operating models, purchase environmentally friendly materials, manage waste in a responsible and transparent manner, and support the green circular economy.
- Attach importance to and implement the protection of biodiversity and natural ecology to ensure the coordinated coexistence of operational activities and natural ecology.
- Encourage customers, suppliers and partners to jointly comply with and share best practices for sustainable development.

We have set clear environmental goals

- 1** Plan to replace some fuel-powered special vehicles with new energy special vehicles every year, and realize full new energy transformation of special vehicles by 2035.
- 2** Complete the construction of a 2,000-kilowatt photovoltaic power system by 2030, achieving an average annual photovoltaic power generation of 1.9 million kilowatt-hours.
- 3** Promote the optimization of the lighting system, carry out the replacement of high-energy-consuming metal halide lamps with low-energy-consuming LED lamps year by year, and fully complete the replacement by 2030.
- 4** Actively promote paperless work, establish corporate data integration and exchange platform by 2030, and realize the full digitization of internal data and documents.

The policy shall be reviewed by the PACTL/PACTL WEST management at the management review meeting at least once a year and updated as required.
